Colours are as close as printing process allows

Wunder Colours Opaque Underglazes

Wunder Colours are Australian Made liquid underglazes with a clay base to give opaque results. They are easy to apply and suitable for all skill levels. Wunder Colours are all lead free, non toxic and are intermixable within the range and also with Design Colours and Cesco Underglazes. They can be economically extended with FK110 Colour Extender or water and may be used on Earthenware, Stoneware, greenware or bisque. This allows potters to create colourful designs, even on coloured clays, either with a matt unglazed finish or a brighter more vibrant result under a clear gloss glaze.
